**Child & Adolescent
Psychiatry Evaluation Services
(CAPES)**

DARNALL
ARMY MEDICAL CENTER

Welcome, we are glad you're here and look forward to helping your child. The Child & Adolescent Psychiatry Evaluation Service (CAPES) offers a variety of programs & services. We provide comprehensive evaluations and consultations for children & adolescents who exhibit a wide variety of behavioral & psychiatric challenges. Our goal is to provide the most clinically effective and least restrictive level of care to our patients.

Our Services

- TRIAGE (PARENTS ONLY)

We perform a screening and classification to determine the priority of need for psychiatric care. Upon completion of required forms, a triage counselor does a brief evaluation of the problem and provides any additional paperwork or forms. The basic-to-advanced triage counselor provides an appointment with a clinician for a comprehensive evaluation and to gather information for definite treatment recommendations.

- Crisis Intervention
- Psychosocial Evaluations
- Psychological Testing
- Psychiatric Consultations
- In-Patient Admissions/Referrals
- Medication Assessments
- Short Term Treatment

Our Services are provided by a knowledgeable staff that includes:

- Child Psychiatrists
- Clinical Psychologists
- Clinical Social Workers
- Social Work & Psychology Interns
- Social Service Assistants

Eligible Patients

Our Services are available for children and adolescents (infant to 17 years old) of active duty and service members who are enrolled in DEERS and are TRICARE eligible.

Support & Education

Attention Deficit/Hyperactivity Disorder (ADHD) Group

This group is for children who have ADHD. A CAPES therapist provides age appropriate information about ADHD and how to cope with the disorder. Games and activities focus on social skills, patience, listening, planning ahead, self-esteem, and other areas that usually give ADHD children and adolescents problems.

Attention Deficit/Hyperactivity Disorder (ADHD) Psychoeducational Group for Parents

Depending on the desires of the group members, the group facilitator presents basic-to-advanced information about ADHD and treatments. This affords parents the opportunity to meet other parents of ADHD children and to discuss specific concerns. Individuals who do not have children attending the ADHD children's group are still invited to attend the ADHD Parent Group.

Adolescents Support Group

This group is a forum for adolescents to discuss pressing issues and to gain insight into themselves and others. This unique approach focuses, but is not limited to, the following issues:

- Personal/interpersonal relationships
- Social/interpersonal skills
- Communication skills
- Problem solving

Anger Management Group (Children)

This group is for children who have difficulty dealing with their anger. The group facilitator provides games and activities that focus on anger control, problem solving, journaling, and self-esteem.

Psychoeducational Group on Anger Management for Parents

This is an education and support group for parents. Participants discuss family dynamics, communication skills, and problem solving. This is an opportunity for parent to meet with other parents and brainstorm about specific concerns.

Referrals

Referrals from various clinics, schools, Primary Care Managers, legal agencies and community services.
